DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 24 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,392,650 (O'Brien et al.).

O'Brien et al. discloses a micromachined accelerometer gyroscope comprising, as illustrated in Figures 1-10, a substrate 36; a frame 12 supporting a number of resonating structures 18; suspension means PF,EF for suspending the frame over and parallel to the substrate to restrict movement of the frame to only rotational movement about an axis normal to the substrate; a plurality of stress reducing members SRF anchored to the substrate at an intersection point with a line through a center of the opposite frame sides wherein the suspension means comprises a plurality of box suspensions CF such that each box suspension is coupled at a corner of the frame. (See, as observed in Figure 10; column 10, line 63 to column 12, line 25).

Allowable Subject Matter

3. Claims 1-15 and 17-23 are allowed over the prior art of record.
